BILINGUALISM: Basic Principles**Hugo Baetens Beardsmore**

180 pages 1982 Paperback 0-905028-04-X £4.90 (\$7.50)

Hardback 0-905028-05-8 £10.90 (\$18.00)

Although there are many titles in the field of bilingualism there has been, until now, few introductory works to the study of this ever-increasing subject that are both readily accessible and easily digestible.

BILINGUALISM AND SPECIAL EDUCATION: Issues in Assessment and Pedagogy

288 pages 1984 Paperback 0-905028-13-9 £7.90 (\$13.00)

Jim Cummins

Hardback 0-905028-14-7 £19.90 (\$34.00)

The author argues that much special education practice with respect to bilingual students is fundamentally misdirected. He makes concrete suggestions both for changing the structure of special education services for bilingual (and monolingual) students and for instituting more appropriate assessment and pedagogical practices.

BILINGUAL AND MULTICULTURAL EDUCATION: Canadian Perspectives**Edited by Stan Shapson and Vincent D'Oyley**

180 pages 1984 Paperback 0-905028-35-X £7.90 (US\$13.00)

Hardback 0-905028-36-8 £19.90 (US\$31.00)

Most existing works focus largely on either bilingual or multicultural education but rarely attempt to fully develop both topics simultaneously. This book is thus intended to provide a distinctly broader conceptual contribution to the field than normally exists in one volume. While this book generally derives from a Canadian perspective, all chapters are developed from a broader research framework and have solid international appeal. As well, since bilingual and multicultural policy and practice include diverse groups and individuals, the audience for this volume includes scholars, policy makers, educators and community organizations.

LEARNER LANGUAGE AND LANGUAGE LEARNING**Claus Faerch, Kirsten Haastруп and Robert Phillipson**

Co-published with Gyldendal, Copenhagen. This edition not for sale in Denmark, Finland, Iceland, Norway or Sweden.

This is a comprehensive introduction to foreign language pedagogy, primarily intended for students and teachers of English, but also of interest to anyone professionally or personally concerned with how people learn and use foreign languages. Methods for analysing learner language are presented and related to a coherent theory of communicative competence and to principles of foreign language learning and teaching. The book draws on the experience and results of a large research project analysing the English used by Danes. The authors have pioneered a learner language approach in the study of English and language pedagogy at universities, colleges of education, and in-service training of teachers of English. Many authentic examples of learner language are provided, as well as suggestions for follow-up activities and further reading.

YOUNG CHILDREN IN CHINA**Rita Liljeström, Eva Norén-Björn, Gertrud Schyl-Bjurman, Birgit Öhrn,****Lars H. Gustafsson, and Ovar Löfgren**

BILINGUAL CHILDREN: Guidance for the Family**George Saunders**

278 pages 1982

Hardback 0-905028-12-0 £14.80 (\$25.50) Paperback 0-905028-11-2 £5.90 (\$10.50)

Children's acquisition of bilingualism is shown to be something normal, something positive, which can be a rewarding and enriching experience for both children and their parents. Since the book was written with the general reader in mind, it is composed in a very readable style and has clear, easily understandable explanations of any technical matters. Containing much useful information and practical advice, *Bilingual Children: Guidance for the Family* should be of interest not only to parents contemplating or actually already raising their children bilingually, but also to educators, researchers and health workers, indeed to anyone having contact with bilingual families and who would benefit from gaining a clear insight into bilingualism in general and bilingual children in particular.

'This is one of the most convincing and most readable contributions to the field.'

BILINGUALISM OR NOT: The Education of Minorities**Tove Skutnabb-Kangas**

396 pages 1984

Hardback 0-905028-18-X £24.90 (\$42.00) Paperback 0-905028-17-1 £9.90 (\$16.00)

This book deals with bilingualism, particularly as it relates to migrants and indigenous minorities. People from (linguistic) minorities often have to become bilingual in order to cope in the larger society, while majority representatives may voluntarily become bilingual. The book begins with a 'purely' linguistic coverage of bilingualism and then deals with the prerequisites and consequences of bilingualism from the perspectives of psychology and pedagogy. It then moves on from the family and the school to international comparisons of societies with different minority policies. It also analyses controversies about the education of migrants and minorities and places them in the wider political context.

Among the topics covered are: The mother tongue, its development and significance and how it differs from languages learned later; definitions and measurement of bilingualism; different ways of becoming bilingual for different groups, in the school and the family; bilingualism, cognitive development and school achievement; semilingualism; guest worker policy and immigrant policy; violence in minority education.
